Platforms students have access to at KS4

Supports the Edexcel GCSE Maths course with exam style question and help videos to support students. The answers are marked immediately by the computer and feedback is given. Teachers will set assignments for home learning using this software.

Supports all GCSE courses. Students have access to short 'pods' which are written by teachers and cover main elements of each course. There check and challenge activities which students can complete to check their understanding. Teachers can also set assignments which guides students on which pods to watch.

Supports with Science and Maths. This free website offers videos and exam practice to GCSE students.

Students have a team per subject. They will find revision resources, their home learning assignments and then can contact staff with any questions through the chat feature. Parents can view assignments set on the app Haldor (as Teams do not have a parent version)

Platforms students have access to KS4

This is our careers advice package. This is useful for choosing options in Year 9 and next steps in Year 10 and 11. It is also used in careers lessons. It will also allow Year 10 student to register their work experience placement and then reflect on it when they are there. This system allows us to ensure health and safety checks are in place for students to be able to go to their placement.

Students and parents have their own log in to Arbor. This is our information system where you can change students' details, note planned absences, check timetables and exam timetables.

Platforms students have access to at KS3

Is a maths programme that helps support students learning of times tables and help them grow in confidence.

Students have a team per subject. They will find revision resources, their home learning assignments and then can contact staff with any questions through the chat feature. Parents can view assignments set on the app Haldor (as Teams do not have a parent version)

Students and parents have their own log in to Arbor. This is our information system where you can change students details, note planned absences, check timetables and exam timetables.

Online learning for Maths, French and Spanish

This is our careers advice package. This is useful for choosing options in Year 9 and next steps in Year 10 and 11. It is also used in careers lessons.

Platforms guardians have their own log-ins to

Guardians have their own log in to Arbor. This is our information system where you can change students' details, note planned absences, check timetables and exam timetables.

Guardians have a log in to Haldor which extends the functionality of Teams. It allows guardians to see assignments set by teaching staff on Teams and which assignments their child/ward has handed it. It also allows guardians to see work that has been marked online and 'handed back' to students.
