

The TEN most essential Mathswatch clips.

Below is a list of what I feel are the *most essential* clip numbers on all of Mathswatch. Login in to Mathswatch, click 'videos' at the top of the screen (under the three lines if on a phone/tablet) and then in the search box you can just type the *number*. WATCH THE VIDEO. Click the yellow button DO THE QUESTIONS. If you get stuck on *anything* TELL YOUR TEACHER.

1. **95** Substitution
2. **135** Solving equations
3. **134** Expanding brackets
4. **79** Highest Common Factor
5. **71** Adding fractions
6. **54** Area of a triangle
7. **115** Volume of a cuboid
8. **128** Pie Charts
9. **129** Scatter graphs
10. **59** Probabilities

If you JUST do these 10 before your mock exams, you *should* definitely score a grade on a paper. But don't stop there the more clips you watch the videos and answer questions for the more your grade will improve!!

LOGGING IN TO MATHSWATCH;

- Browse to VLE.Mathswatch.co.uk
- If you Google Mathswatch make sure it is a .co.uk site, and then look for 'VLE login' on the front page to get the login box.
- Your login is firstnamelastname@stmartins3-16 but obvs replace firstnamelastname with your actual name.
- If you have a hyphen in your name, then it's in your login too.
- Your password is algebra (all lower case)
- If a yellow 'Sorry...' box appears check you have used the correct login and password. Common mistakes are upper case in the password or people using school email for your login, this won't work.
- If details are correct and the 'Sorry...' box still appears, spam the button – Mathswatch is sometimes slow to let people in.
- If you still can't get in TELL YOUR TEACHER.
